Designed with you in mind - Just plug and play!

Take a 42" or 43" plasma display along with your media consultant's components (guaranteed to fit), add a center speaker above the TV, a fifteen space Middle Atlantic AXS rack and room for a large subwoofer and you have an attractive cabinet that enhances the decor of your bedroom, living room or family room as well as the functionality of your media equipment.

With your DVD player, CD and VCR rack mounted you have a home theater control center for any room that will be functional for years; even when components change. Your media people can service or change components cost effectively. Ventilation, wire and power access have been engineered to make cabinet set-up and component installation quick and easy; saving you time and money. We verify component requirements with your media consultant to insure our cabinet will fulfill your needs.

Please note: Your subwoofer may require an audio transparent (speaker cloth) door panel.

All cabinets include:

- Integral levels and levelers for easy, accurate set-up with just a screw driver.
- Heavy duty pocketing door hardware for smooth, long lasting operation.
- Clear finished UV cured maple interiors that are durable and easy to clean.
- Shelves behind the upper pilasters for storing the CDs or DVDs you are currently using. Additional storage can be accommodated in the rack area below.
- Cabinets measure 60" wide x 97" tall

Choose the style that fits your space

The standard line offers molding, pilaster and door options that you combine to achieve your design objective. We furnish shop drawings of the configuration that you choose so you know exactly what you are getting.

If you prefer seamless integration with your interior molding details we will work with your contractor or molding supplier. There is no extra charge if we are able to purchase the moldings for your media woodwork along with your molding order. We can also assemble a custom solution for media woodwork or woodwork for any room in the home - your design or ours.
